### Sunnyside Farm Current Herd Bulls

The Sunnyside Farm Cow Herd has been developed since 1986 when Buck returned to the farm from VA Tech joining his father in the farm business. They have consistently utilized KCF Hereford Bulls and Angus Bulls in their herd of 140 cows. Hereford Bulls are used on the herd of black cows and Angus Bulls on the red Cows.

The heifers are the result of multiple generations of KCF Angus and Hereford genetics. They are designed to perform at a high level. The farm has been involved in our VA Quality Assured Feeder Cattle program over the past 10 years consistently producing L1 and M1 feeder cattle. Review the current set of bulls in the table below. .

Excellent genetic power in this set of bulls.

These heifers were consigned to be returned to the farm. Buck passed away in January resulting in their consignment to our sale. Buck will be missed in our AAC LLC as a participant and leader.
